Dear Harold,

Each time I get "a bindele brief" from you, I think "Here's the outline to 'You and I and the FBI.'" Alas, it ain't so! Not even a good "reason" why you won't undertake to tackle my offer. You have so much info and facts in your encyclopaedic noodle of yours that you could write a 500+ page book from "the top of your head" — in 6 months!

In fact since I last broached the subject of the book you have written enough stuff to write "the book"

I can't understand why you waste your time and energy on what you do. Take a breather from your extra-curricular correspondence and do "my book." I think it will be the crowning achievement (contribution)

to your career in public service.
Besides, it will relieve you of aggravation.
Instead of getting mad at the FBI (and CIA)
why not getting even with them?
Until I hear a definite no from
you (with good reason) I will continue
to hound you. Or am "barking up" the
wrong tree? Are you, dogmatically opposed?
Your last packet, (the one with the
letter to and from Earl Ray) was
very interesting, as they all are.
Do you really believe that he can
prove that the FBI killed Dr. King?
Has anybody "proved" that a conspiracy
killed JFK? The public seems to be
satisfied with the present explanation
and is willing "to let sleeping dogs lie".
Only history may arrive at the truth. By
then, who in the hell cares!
But you, NOW, can write something
that contemporary readers want to know:
the truth and facts on about the FBI & CIA.
Perhaps, you prefer dribbley correspondence
over a planned book about your detractors.
Am I right? Best to Lil, Shalom! Joe
